

Collaborate with Papa Paper

Laminated Glass from Natural Materials

Every day, natural by-products are burned, their hidden value lost. Now, corn fibers, coconut husks, and coffee grounds are reborn as artistic patterns on glass, bringing life to every corner of architecture.

TYK Glass collaborates with Papa Paper to transform overlooked materials into designs that tell a story, serving as a bridge between nature and design.

Sustainability, for us, is not just reducing waste—it is creating new value from the unseen.
