

tintedglas

Float glass with colorful, translucent tints is created by adding metal oxides like iron and cobalt to raw material mixtures. These additives enhance the glass's ability to absorb thermal energy and reduce light transmission. The glass color depends on color intensity, thickness, and base glass composition, resulting in a range of visually appealing architectural and design elements that effectively manage solar radiation while providing aesthetic versatility.

Product Specifications

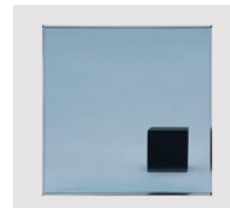

Thickness Size	<p>Thickness: Start 3-12 mm. Maximum Size: depends on the color of the glass.</p> <ul style="list-style-type: none"> • Euro Bronze - 84" x 144" • Euro Grey - 96" x 144" • Blue - 2134 x 3210 mm. • Green - 84" x 120" • Dark Grey - 84" x 120" <p>Remarks: Although we can accommodate sizes outside the recommended range, please consult with us on a case-by-case basis.
